

8-Way Relay Output Card

The CAX-RL8, 8-Way Relay Output Card, is an internal peripheral card for use with Advanced Axis AX Series Intelligent Fire Alarm Control Panels. The CAX-RL8 card provides 2 Form-C and 6 Form-A (normally open) freely programmable relay contacts. Communications of the card and relays is done via a flat ribbon cable connection to the CAX-CTL base card.

Compatible with the Axis AX Series Dynamix I/O relationship programming, the relays of the CAX-RL8 can be individually assigned to any input or output relationship, output group, timing function, gated function, invert operation, etc. to perform project specific control operations. To simplify installation, each CAX-RL8 relay output is pre-configured to activate on common alarm.

Ideally suitable for elevator control, HVAC shutdown, door holder release, or similar ancillary functions, each CAX-RL8 relay is rated 30 VDC/VAC @ 1 Amp with a PF rating of 1 (resistive).
