

## Sonos Pulse Ceiling Beacons

A general purpose range of visual alarm devices, suitable for fire, security and industrial applications; the Sonos Pulse Beacon is designed to comply with EN54-23.

With the TimeSaver base, connections are made to the base during the initial wiring phase which results in faster and more reliable installation. The sounder head 'twists and clicks' into the base on commissioning, avoiding the wiring and connection problems associated with traditional sounders.

The electronic design maximises system efficiency by minimising power consumption, also eliminating power surges during start up.

The Sonos Pulse VADs protect everyone including people prone to photosensitive epilepsy.

The Sonos Pulse ceiling mounted devices deliver an EN54-23 approved coverage pattern of C-3-15. Each Sonos Pulse wall mounted device can be mounted up to 3M high and provide a 15M cylinder diameter coverage, which can cover a 10.6M by 10.6M square room with a single device.
