Axis EN

Remote Indicator - obsolete

The remote indicator unit has been designed for use with either conventional or addressable smoke or heat detectors. The device is used to indicate detection operation in remote or inaccessible locations such as ceiling voids. The unobtrusive low profile sleek design is an attractive warning too for any type of location.

The wide operating voltage range means that these devices can also be used as a visual indicator in security, process control and other general signalling applications.

Units are available with or without 'Fire Detector Operated' text.

Features

- For use with either conventional or addressable detectors
- Sleek design
- High-intensity LEDs
- Wide operating voltage range

Specification

Power Supply	5 to 28V_{DC}
Current	24ma
IP Rating	Indoor
Operating Temperature Range	-10°C to +55°C
Construction	ABS
Weight	50g
