

Fibre Optic SFP Module - Bi-Directional

There are two Small Form Pluggable (SFP) modules, MXP-635-BD/AB (UP) and MXP-635-BD/BA (DOWN). These SFP modules can be easily fitted into the Advanced MXP-635-A and MXP-635-P products. Which, when used in conjunction with each other, provide bi-directional network communication on a single fibre optic cable.

The SFP modules include an enhanced Digital Diagnostic Monitoring (DDM) interface, which is compliant with SFF-8472. Where the DDM interface allows real time access to the module operating parameters such as SFP temperature, laser bias current, transmitted optical power, received optical power and transceiver supply voltage.
