ExGo

Manual Release and Emergency Stop Button

The yellow Manual Release and blue Emergency Stop Button complement the ExGo extinguishing and suppression control panels.

EXP-010 Manual Release Button (EN12094-3 Type B) incorporates a latching push button switch. Break the glass and press the button to activate the circuit. Press the reset switch to deactivate.

EXP-011 Emergency Stop Button (EN12094-3 Type B) incorporates a momentary (non-latching) push button switch. Break the glass and press and hold the button to activate the circuit.

The buttons are easy to wire, and multiple units can easily be connected together in series on an input circuit.

They are compatible with the ExGo gas extinguishing panel and remote status indicator panel input circuits.

Installation requires EXP-005 switch EOL for terminating the switch input circuits.

Approvals

- EN12094-3:2003
- EN54-17

Features

- Robust aluminium die-cast housing with a door aperture angle > 180°
- Operating instructions in the form of symbols for EN54-11 compliance
- Replaceable door label
- Red LED for optical indication of activation
- Easy to replace standardised glass plate, see Part Number options
- Button housing can be opened with key, see Part Number options

Specification

Dimensions (H x W x D)	126mm x 126mm x 35mm
Approvals EN12094-3:2003	EXP-010 0786-CPD-20251 EXP-011 0786-CPD-20363
Protection Class	IP43
Temperature	-20º C to +60º C (continuous operation) -25º C to +70º C (max. 12 hours)
Humidity	95% humidity (non-condensing)
Activation Module	EXP-005 Module
Cable Glands	2 x 20mm (top or bottom entry)
Weight	420g
