ExGo

Logo & Extraction Tools - PC-NeT Software

To support the ExGo series a suite of PC tools has been developed with advanced programming features.

For our gas panel systems we provide an easy to use logo programming application and a user friendly PC extraction software for customised reports and back up of system configurations.

PC-NET-007, Logo Programming software permits the creation of, and allows upload to the ExGo series, a customised logo allowing the product to be branded by the end user.

PC-NET-013, Ex Extraction software allows full download of Gas system configuration and event log. The user-friendly software provides a quick reporting log book, showing full system configuration, full event logs and a quick reporting guide to customise system reports for end users.

Features

- USB upload/downloads
- User-friendly Windows based software
- Export information to Office applications
- Download event logs and system configuration
- Customised printouts
- Panel branding via electronic logo
