

Flush-Lite

A flush-lite luminaire is a discrete option of introducing emergency lighting to a location. The luminaires sit almost completely flush to the surface of the wall or ceiling, available with white surface trim plates, or for a more stylish option, Chrome or Brass surface plates can be supplied with the luminaire.

The standard Flush-Lite comes with a galvanised steel back box, epoxy coated white surface trim and a prismatic polycarbonate diffuser. This can be replaced with an opal polycarbonate panel if required. This is a good option if it is planned to add an adhesive exit legend to the Flush-Lite.

Operation

The Flush-Lite is available as maintained and non-maintained units, which in the event of a local lighting circuit power outage, the Flush-Lite will output 180 Lumens for three hours from integral high-temperature nickel cadmium batteries. Maintained versions can be used for standard switched mains lighting but will automatically provide emergency lighting in the event of a complete loss of normal mains supply.

The luminaires fully comply with the requirements of EN60598.2.22 and fully supports all of the features of the Lux Intelligent range of testing panels.

Features

- Discrete emergency luminaire
- High 180 lumens output in emergency
- Fully complies with EN60598.2.22
- Fully supports all the features of the Lux Intelligent panels

Specification

| | |
|-----------------|---|
| Supply Voltage | 230 Volts (220-240V) @ 50Hz |
| Supply Current | Maintained: 90mA Non-maintained:40mA |
| Lamp | 8W T5 |
| Battery | 3.6V 4 AHr NiCd (nominal charge current 250mA) |
| Recharge Period | 24 Hours (14 hours for 1 hour duration) |
| Cable Entry | 20mm holes at each end |
| Geartray | White painted steel on keyhole slots |
| IP Rating | IP25 at Ta °C |
| Dimensions (mm) | Cut-out 340 (L) x 128 (W) Fascia plate 380 (L) x 145 (W) |
