MxPro 4

20 & 100 Zonal LED Cards - obsolete

The Zonal LED indicator cards are a range of panel mounted peripheral modules that can be added to the MxPro 4 series of control panels. The display cards are available in numerous configurations and provide individual indication of the zone(s) in fire.

The units fully support dynamic zoning on networked or larger stand alone systems and can be used to provide individual zonal LED indication at one location.

20 zone units are available which are fitted to the front display plate on the MxPro 4 series control panel. The Mxp-013-100F incorporates 100 LED indicators and is compatible with all MxPro 4 series multiloop panels.

Features

The cards are capable of simultaneously displaying all zones in a fire condition and incorporate a unique power saving feature to minimise the power drawn from the control panel in the event of a major fire.

Several other options are also available within the MxPro 4 range for applications where indication of fire signals from zones in addition to the panels graphical display is required. These options include Advanced Mimic Units, graphical systems and printers.

Features

- Up to 200 zones available
- 3 year warranty as standard
- Factory fitted or retro fit
- Dynamic zoning
- Cost effective against ancillary hardware

Order Codes and Options

Mxp-024F - Omit the 'F' for retro fit:	20 Zone LED Card and Label Fitted to a MxPro 4 1 loop panels
Mxp-025F - Omit the 'F' for retro fit:	20 Zone LED Card and Label Fitted to MxPro 4 2 & 4 loop panels
Mxp-013-100F - Omit the 'F' for retro fit:	100 Zone LED Card and Label Fitted to MxPro 4 2 & 4 loop panels
