Conventional Waterproof Resettable Manual Call Point

The Waterproof Resettable Call Point is a unique manual call point that mimics the feel of breaking glass whilst offering the user the benefits and environmental advantages of a re-settable operating element.

The 'ReSet' uses a simple yet ingenious patented mechanism which consists of a rigid plastic operating element and an over centre spring mechanism. This arrangement provides real action on operation and simulates break glass activation.

An activation indicator drops into view at the top of the window after the ‘ReSet’ has been operated. The unit is then simply reset with a key and is ready for re-use straight away.

The waterproof ReSet has been designed to deal with today's difficult and harsh environments and is compatible with most conventional fire alarm systems.

It is ideal for all outside applications such as oil rigs, ships, factory's as well as wash down areas that are sensitive to broken glass.

Approvals

- EN54-11:2001 +A1:2005 (08-WRP2-R-01 only)

Features

- IP67 Waterproof
- Glass appearance maintains operator deterrence
- Positive activation that mimics the feel of breaking glass
- Visible warning flag confirms activation
- Simple key to reset operating element – no broken glass
- No glass elements to break, lose or incorrectly fit during installation
- Complete functional test with every activation
- Extremely attractive, high value look and feel
- Low profile, heavy-duty terminations – Two built-in resistor values
- Available in Red, Yellow & White

Specification

Current Rating	All series: 3 Amps 12-24V DC. Series 2: 6 Amps 125-250V AC
Housing and Mounting Box Material	Polycarbonate
Electrical Contact Material	Silver plated brass
Operating Temperature	-20˚C to +65˚C
Installation Terminal Conductor Size	0.5mm – 2.5mm
Colours	Red, Yellow, White
Mounting	Surface with back box
Dimensions (H x W x D)	90 x 89 x 72 mm

Order Codes and Options

08-WRP2-R-01:	Red
08-WRP2-Y-02:	Yellow
08-WRP2-W-02:	White
