Fibre Optic SFP Module - Multi-Mode

The Small Form Pluggable (SFP) MXP-635-MM (multi-mode) is a fibre optic transceiver allowing communications for up to a maximum distance of 2km between fibre optic converters. This SFP module can be easily fitted into the Advanced MXP-635-A and MXP-635-P products.

The SFP module includes an enhanced Digital Diagnostic Monitoring (DDM) interface, which is compliant with SFF-8472. Where the DDM interface allows real time access to the module operating parameters such as SFP temperature, laser bias current, transmitted optical power, received optical power and transceiver supply voltage.
