Axis AX

Battery Enclosure

The AX-BAT, Battery Enclosure, is designed to accommodate up to 40Ah batteries to support the Advanced Axis AX Series Intelligent Fire Alarm Control Panels. In addition, an optional battery tray can be added to support multiple sets of batteries.

Note: The battery charging output of the Axis AX Series Intelligent Fire Alarm Control Panels (via AX-CTL Base Card and AX-PSU-6 power supplies) is temperature compensated to maintain the optimum charging voltage in accordance with the manufacturer's specifications. Housing the batteries in the external enclosure could lead to the batteries being charged at an incorrect voltage – to avoid this, ensure that the external battery enclosure is installed in an area with an equivalent environment to the installed location of the Axis AX Intelligent Fire Alarm Control Panel.

Features

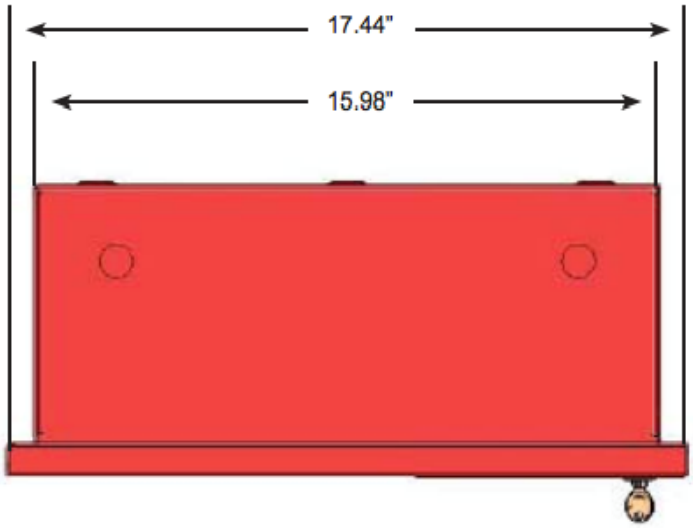

- Accommodates up to 40Ah Batteries
- CAT30 Keyed to match Axis AX FACP & Pull Stations
- Surface or Semi-Flush Mounting
- Integral Battery Retaining Strap
- 16 Gauge Steel Construction
- Easy to Install
